

Main Line of Advice: No Associating or Engaging with Retarded Street Theater and Degenerate People doing Religious Fanatic Crazy Things, Remember both Bush and Obama and all the Nonsense, People in Society are Brainwashed as Fuck.....
911=Mossad OP , Zionism = Whitewashing and ADL BS.....
No mentioning of Gang Stalking when it goes by 40 other titles such as Community Policing KST Coercive Persuasion Racketeering Title 18, Narc Abuse, Manipulation of Info/Actions and Property and Behavior AKA reprisal and Mind Control....
Forcing Info and Religious BS on users against their will.....

[Anarchist2 hours ago](#)Highlighted comment

why did you removed your comment on my channel? ps i used the standard linux and kali linux for a while. but as you are saying as a tortured person it does not matter they find a way to break in your system its like cat and mouse. and windows is easier in handling you dont need the console and it supports much more programs and it has a better optimization. greetings from germany

[Dominus Sathanas1 hour ago \(edited\)](#)

You are right, there is no perfect solution, I make a guide, then I have to keep moving to another kernel, another this, another that, because the government has all the Open Source Architectures and BIOS ROMs and denies us the GP the Tech... The embedded stuff at a DMV or security building, why is it another architecture in ALL CAPS based on UCC code.... Freedom and Rights are Imaginary, UCC is the Law everywhere.... PSI Tech Coproation another fraud front group for Psychotronic Weapons Research and the Smirn off patent, Joni Douriff another TI, Dane Spotts a shill agent of them, CFR and UN make the CIA... Mayday in Germany was that one thing then came CFR(org)... The 1666 Act is Cestui Que Vie (birth maritime law)... The 1871 Act is what made America a Corporation and our constitution is what makes us Yankees.. RE-TITLE FOR->OF (1984).. Uniform Commercial Code is another part of it... Business Interests... Politicans are the illusion, 3 branches, then 12 share holders.... Bill Hicks, George Carlin, Bill Cooper, Jordan Maxwell, Michael Tsarion, the 2 comedians had some sanity at least... Everyone of a newer generation appears sterilized and emasculated... HG Wells and George Orwell get there books deleted by Canonical. The serer is [3.3.3.3](#) = that thing can be blocked in hosts file to [127.0.0.1](#)..... I have read Michael Aquinos books, stuff on Thelema, Freemasonic Books, books on the Rose Croix and John Lilly who did a deal with DHS, Faronic is the old system, Jaguar just means Monarchy, that land is erased from History and on Library of Congress instead. Tartaria/ie/y and William of orange, Yale's Library has Skull and bones all over the archives, Dept of Special Collections has Cult Awareness Network and how Scientology bought it plus we see how the Eastern Establishment created cults and got into our CIA, The CIA started the Church of Scientology, Zionism?? In out of body I saw a Coporatocracy and Monarchy that was

crap.. immanuel goldstien made a video saying telepathy often resides in the astral, that is how these Mafias do this, whether Italian or Jewish, they setteled here in USA first, Lief Erickson, then Columbus, The Freemasons, Lions, Clubs, Kiwanis, Lodges are now replaced with Social Security paid for by Tax Money... Law Enforcement is based on Freemasonry, Masonic Books all show people such as Corrupt FDR and Nixon in their Bibles... I bought one on ebay, No ASIN, No ISBN, not on Google/Duckduckgo. Books are on Hemp/leather and people do not bother. The rest of what is on a Search Engine is watered down info. The rest of the books are off of shelves and sold on say ebay. They control what property we can and can't own and possess. It is a Corporatocracy, even Blue Light is hard to avoid in USA... I get the Vintage Edisons, an LED is a Computer full of stuff... Stuff sold at a merch or store all has a chip or tamper in it.. Postal workers have been known to honeypot/trap products.. If you look at the land outside in Baudline you see some stuff on the FFT graph at a wide range of frequencies, Every other country??? This ruling Zionist class did 911, whitewashing is everywhere.... The BIOSes of 2003 will not load say FreeDOS from the floppy version... Now with UEFI you have problems loading Linux.... Coporatocracy?? Legacy is better however the 486 can run 1MB FreeDOS on a CF Card... The older Commodore had replacable chips, It got less dense.... Density is getting worse, Zionists in Israel do Terrorism at Intel... The quality is requiring more Human Trafficking and Sweatshops... Foxconn is based on kids you see on Missing kid Milk Cartons... Human Trafficking is done at Costco, Wal-Mart, Home Depot and all these Zionist Business in the USA, The Malls as well... A can of Ronson??? Kyle Odom explains the Underground Snuff Industry Katy Groves shows and MKULTRA, it all interconnects, underground bases, stuff we can't see. A lot of stuff they (the press) will hide... They conspire to lock us into UEFI to stop us from running other Kernels, BeOS can do GPU without the need for additional acceleration however it is Hybrid and probably forked same with the rest... Developers want ethical code and unforked stuff, the Zionists want to ruin it with low density/faulty chips/memory leaks.... The Apollo 11 used only KB of ram now we had the other stuff implemented by Philanthropists who wanted to take society the other way, It is a Tool for Eugenics, so is Blue Light, The Lilly Wave is also mind control, SCALAR is jammed up with cat /dev/urandom in tty1. Slitaz for instance is 50 megs of overhead, and has no bash just ./ Devuan while installed has no Systemd and user is not in sudoers file so sudo only run thunar on root, even FreeDOS online is what people resort to, Antiforensics guides exist, However even simple sigils are better than a One-Time Pad of 000-999 per 40 sets... Computers shipped within said country may have a RAT that is HW based sold esp Online... The news stories on RT and any other Alt-Press such as Bitchute show that as well... Open Source BIOSes and CPUs are Scarce however Richard Stallman has his BIOS Librebooted, OpenRISC started as Embedded.. If companies were not so controlling we would not have this.... Many versions of Kali Linux are only for Pen Testing and not for Security, Tor Nodes are compromised, same with i2p, VPNs are often stuffed and Paid ones work better, SSH Tunnels are another thing people use, Systemd does run on the latest Kali Linux... They listen to the house I am in I got an electret right now I have recorded the yelling and listening, People in our society are even Telepathic and Remote View plus Subvocalizations can be logged into plain-text files with a PRNG.... I was oblivious to this stuff, Kyle Odom wrote it in his Manifesto... There are a lot of aspects to it... I get frustrated as to how I am in Society, The people I am around are Religious Nuts, Television Watchers and even wat Fox News, when Lee Camp said 1M people are dead in Iraq this is insane, meetup groups I went to all agreed, in real life at meet ups communication is sometimes solid, online stuff is intercepted, ASCII/UTF8 is re-arranged... Email is a Worthless Communication even IRC-freenode as a brand new nick name and a prng #444217341273 works better than email... The Phone is the worst because Law Enforcement and USSS always see me, I drew harmless diode/zig-zag tazer schematics and saw the USSS at a Funny Farm, They had the shades/white coat/arsenal that I couldn't see... Invisibility cloaking and Remote Viewing are nothing new or special, The Tim Remington Shooter Kyle Odom even had a reference about the Program in his PDF Manifesto... What CPU, What kernel, if Debian (Systemd or no-Systemd) Bit Rate, CPU Architecture Type, EMF can be decoded through the Power Grid Even, Amplitude Modulation puts off signature waves overtly showing what we type on Amplitude Modulation... As you would know

before we had Julian Assange and Ed Snowden we had the Free Software Foundation and the Linux Kernel... Richard Stallman shows Ethics on his website (stallman*org)...
En*wikipedia*org/wiki/Open-source_computing_hardware They also control the USA just as much as CA or MX or any country...

1 up

[@Dominus Sathanas](#) guess why i am a anarchoprimitivist :) ALL PROBLEMS SOLVED

[Dominus Sathanas13 minutes ago \(edited\)](#)

These fluoride heads see a snuffing going on and just ignore it, I see a dead body and a coroner laughing a sheriff one and no one notices, the world is absolute fucking hell. Latin Phonemes have the UTF 8 bin set tilda is 01111110 a Sigil that is done by an Occultist at a Holotropic AKA non linear thought is totally random and hard for even the Telepathic or Remote Viewers... The One Time Pad has 50 K maybe, now with Quantum cores, they used the Air Waves to do math, back during tubes they did that.... The Crime Network??? The sound card is a Radio that goes every spectrum even the NON-FCC guarded ones, Government Info when you hook a modulation circuit to the sound card then run SDR# or Audacity, UHF is still sending OTP... Look at Latin and Vatican Roman Law of 1666 AD..... Cestui Que Vie Earth Liberation Front got spammed out by CNN then Charles Jaco did some good silly acting during the Gulf War, I am so weird-ed out some are still traumatized and disturbed that the MSM considered a Fake News Actor Charles Jaco a War Hero, I saw the Set and Hotel... Every one of those Hotels is honeytrapped, Saw the Guard there, she gave me a verbal warning with legal codes I could not understand based on some secret court and some monarchy, does it matter, Why the LED behind the partially shivered mirror, the hum was noise also, why the fan system when embedded would be silent, why so overt.

My Original Post: Dominus Sathanas 3 minutes ago (edited) What I ended up doing when Society in General Rejected me was: Throw away Windows and Mac/Canonical/Android/Google for Linux... Ditched Encryption for Sigils no Binary Set + Use One Time Pads ... Everyone is cutting the cable and their Profit Margin Zionist Garbage. Minux3 Nanokernel FreeBSD Haiku Kolibri Redox OS FreeDOS React OS... I am browsing with Pale Moon and ABPrime Live on Ram Disk is okay... I go with the Live USB other kernels you can remove the USB and Mitigate to a fuller extent, because Drives have a Track0 and DVDs get bad super-block reads.... Slitaz and Puppy Linux Mitigate with USB removed... Slitaz is 50M and runs 100 on 64b and 50 on 32b Puppy Linux has a version with Pale Moon and Mozilla Firefox has MSM content Now... You can render a swap file form /dev/zero and have RAM or use a RAM disk, The CLI functions have Openssl and base64 + md5sum and bc -l When you remove other USBs it can Lock Access Controls and Commands.. People will Isolate with Virtualized Processes Qubes uses a crap node though, The Low Overhead ones are stable, Nanokernel and Micro, The Space Communications use Rodos and Nix-Like OSes, Embedded in every counter-department and surplus store to log people, The GPU is a backdoor in itself and people such as Richard Stallman use CLI mode and Lynx... They have ways to even use YouTube in CLI with Lynx and a CLI video... Those are all the common Anti Zionist Market-share ones with GNU/Linux... Cutting Off their Profit Margin BDS Movement Stallman(org) FSF(org)... Germany is behind the times, no different to any other... They shove the 6M thing on us and the 911 Official Story... The 911 Commission Report and Global Warming Crap LGBT Crap... I remember

the PI and USSS Tards I saw in a Psych Hospital... I thought we had Separation of Church and State, Hell NO.... Systemd in Debian is a Backdoor Perps Gang Stalkers love... Every Kernel has Pros and Cons, Windows has no access controls due to Philanthropist Bill Gates who was into Stalking and a Pedo... Mac OS was shut down after Steve Wozniac Died Re-Forked Promoted... All of those have NSA Back-doors and CPUs now are NSA based... Some people see firmware back-doors in old sound blaster PC cards... Devuan is a fork of Debian without Systemd. Devuan(org)... These Doctors Offices and Hospitals do not have HIPPA Compliance... They were running Windows Server 2000 , I defaced one once... I set the Root and User Password a BIOS PW and lock in an Ammo Can. A .50 Ammo Can I put a MSI Wind in with Devuan and a Pad Lock... Steel/Iron blocks more RF than Aluminum or Copper or Tin... Ferromagnetic Shielding plus I avoid the WiFi... Remote Access Tools are common on Un-encrypted Drives and Open Port OSes that are Proprietary such as Windows Mac and Android... If Zenmap shows open ports then It sometimes shows RAT Tools..
